

WHAT IS CLAIMED IS:

1. A rack for holding objects on, comprising
a main frame having lateral supporting portions at two ends
5 thereof;

two rotary frames pivoted to respective ones of the lateral
supporting portions of the main frame; and

a plurality of holding rack parts each pivoted to the rotary frames
at two ends thereof; each of the holding rack parts having a plurality of
10 receiving holes thereon for objects to be passed through.

2. The rack as claimed in claim 1, wherein each holding rack part
has a plurality of rings connected together for providing the receiving
holes.

3. The rack as claimed in claim 1, wherein the receiving holes
15 have different sizes.

4. The rack as claimed in claim 2, wherein the receiving holes
have different sizes.
